

Custom Alloy / Research and Development Products

Atlantic Equipment Engineers, Inc. is an ISO 9001 supplier of metal powders and compounds. In addition to being in our catalog of high purity metals and compounds we have a team of dedicated engineers that can customize existing products and develop new materials for R&D and production.

Chemistry

List the composition below with desired percentages, and tolerances for each additional element

Ex:	Nichrome	80%Ni	20%Cr	79-81%Ni	19-21%Cr

Size

Include all dimensions, screen / micron sizes and ranges / thickness / diameters / drawings

<input type="checkbox"/> Powder	<input type="checkbox"/> Ingot	<input type="checkbox"/> Rod / Tube	<input type="checkbox"/> Sputtering Target	<input type="checkbox"/> Custom Shape
Ex:	-150+50 microns	100%-150	95% min +50	Spherical shape

Quantities

Minimum order quantities may apply. Please include unit of measure.

Immediate	R&D quantity	Production quantity

AEE partners with labs and facilities that can produce new, as well as customizing existing materials. Our US and global manufacturing network and partnerships are capable to melting, synthesizing, purifying, machining, bonding, atomizing and depositing various materials. Just like our quality policy mandates, Atlantic Equipment Engineers is committed to customer satisfaction, and to meet or exceed quality objectives!
